Mass Transit Announces Top Tech Innovations ***Honors innovations that are making a difference in the public transit industry.***

Fort Atkinson, WI (February 12, 2010) – *Mass Transit*, the only magazine exclusively dedicated to public transportation, announces the *Mass Transit Top Tech Innovations* list, honoring those technologies that have made significant contributions to the public transit industry. The innovations were nominated by industry professionals and judged on criteria that included cost savings, improving employee and/or rider safety, improving security and creating a more sustainable operation.

“Millions of people utilize public transportation every year, relying on it to transport them to work, school, social and sporting activities,” says Publisher John Hollenhorst. “The technologies chosen for this year’s list have proven their value in assisting agencies in improving their operations, in turn providing better service for its riders.”

“We received more than 100 nominations and could easily have extended the list,” adds Editor Fred Jandt. “It was challenging to narrow it down, but we are confident that this list is made up of an impressive array of innovations that will continue to play a significant role for transit agencies.”

Winners will be showcased in the February issue of *Mass Transit* magazine and online at www.MassTransitmag.com.

Mass Transit magazine serves more than 21,000 readers associated with the public transportation industry including transit managers, industry suppliers and industry associations. It is the only publication that focuses on the people who manage the business and their successful management practices. The publication’s editorial content provides subscribers with management, marketing, operational and product information they need to better manage transit systems and overcome the changes in today’s environment.

Mass Transit and www.MassTransitmag.com are published by Cygnus Business Media, an internationally-recognized business-to-business media company. Its diverse portfolio serves 13 market categories with print and interactive products, and live events. Through its media, the company reaches more than 1.5 million print subscribers, nearly 1 million industry professionals via its Custom Marketing services group, and attracts 2 million unique visitors to its websites monthly. Cygnus Business Media provides comprehensive, integrated advertising and marketing programs for some of the world’s strongest business-to-business brands.
